

## Technological performance within your reach

In recent decades, we have come to realize the environmental impact of our choices and decisions.

**Sketch Nanotechnologies** develops innovative products to optimize the performance of your existing windows, ensuring better comfort at all times while significantly reducing your heating and cooling costs.

As the Exclusive Distributor for Canada, we are proud partners of Japan-based Sketch, Co. Ltd., a company which has already demonstrated the efficiency of its products throughout the world.

Our treatment was developed in collaboration with companies such as Mitsubishi Materials Group, JGC Catalysts and Chemicals Ltd, Toshiba Corporation, Toyota Central R&D Labs, Kyoto University.

# Insulate your glass with SketchNanoGard

## About SketchNanoGard

We offer you energy efficiency, improved comfort and savings for all types of buildings.

- Blocks **99% of the harmful UV** rays and blocks up to **85% of the Infrared** rays.
- Allows for **two to three times more natural light** to pass through than conventional window film.
- Reduces **condensation on the glass by 50%**.
- Saves up to **27% on your energy bill**.
- **20 plus years** durability.

### DIMINISHES HEATING NEEDS IN THE WINTER

## Improves energy efficiency

SketchNanoGard is a nano-coating which creates a thermal barrier on your windows.

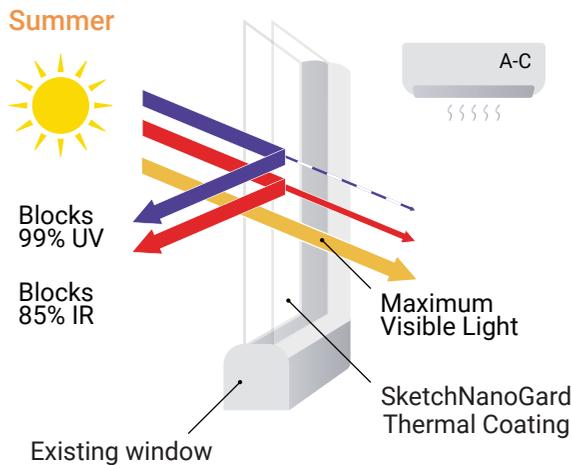

It's a simple and efficient solution to improve your comfort while providing energy savings.

A highly efficient indoor application process which is more cost effective and much less disruptive than replacing your windows.

An environmentally smart choice.

### REDUCES AIR CONDITIONING NEEDS IN THE SUMMER

● UV Rays    ● Infrared Rays    ● Visible Light

# Save up to 27% on your energy bill\*

## Save year after year

Scientifically tested for the Canadian climate, Sketch Nanotechnologies' products allow you to increase energy efficiency, while being ideal in a global strategy of renewable energy.

Save year after year

Stay cooler in the summer

Stay warmer in the winter

Save energy to preserve the planet

\*As demonstrated by scientific research conducted by a leading University's Architectural Sciences laboratory.
